e) Other

6.14.2. How long must records of transfers be kept?

10 years after transfer in case of war weapons

Other

# Sources Actions taken during the reporting period

PoA II.6

6.15. During the reporting period, was action taken against groups or individuals engaged in transferring SALW illegally (e.g. prosecution)?

Yes

6.15.1 Details.

Under national law in conjunction with the principle of mandatory prosecution, every case of illegal transfer of SALW is prosecuted. Within the European Union, the monitoring of legal transfer is governed on the basis of council directive 91/477/EEC on the European Agreement of 1978

PoA III.6

7. Does your country wish to request assistance in developing laws, regulations or administrative procedures to exercise effective control over the export, import, transit or retransfer of SALW?

### **SECTION 4: BROKERING**

Sources	Lo	TANC	regulations and administrative procedures	1000000
3001063	-	ws,	regulations and daministrative procedures	10 (2.45)
PoA II.14	8.	Do	es your country have laws, regulations and/or administrative procedures governing brokering of SALW?	Yes
		8.1.	<b>List laws and/or administrative procedures regulating SALW brokering in your country.</b> Section 4a of the War Weapons Control Act	
			8.1.1 Are those laws and procedures part of the national arms export control system?	Yes
		8.2.	Does your country require registration of SALW brokers?	No
		8.3	Does your country require a licence, permit or other authorisation for each brokering transaction?	Yes
GGE Report para	ı		8.3.1 . Are such applications for a licence, permit or other authorisation considered for approval on a case-by-case basis?	Yes
			8.3.2. Are there exceptions to the requirement to hold a licence or authorisation for a brokering transaction?	Yes
			<ul> <li>8.3.2.1. Details (e.g. if the transaction is on behalf of the police or armed forces or other government officials) (e.g. if the transaction is on behalf of the police or armed forces or other government officials) An (additional) brokering permit is not required if war weapons are to be imported into or transported through German territory in execution of the contract (section 4a(3) War Weapons Control Act)</li> <li>8.3.3. What are the criteria for granting a licence, permit or other authorisation? Brokering licenses are granted in exceptional cases to German manufacturers in conjunction with export</li> </ul>	
		8.4	Contracts  Does your country have measures to validate the authenticity of documentation submitted by the broker?  8.4.1 Describe those measures.	Yes
			As German manufacturers are well known to the authorities, validation is not an issue	
		8.5	Is it a criminal offence in your country to engage in a SALW brokering transaction without a licence or authorisation, or to do so in a manner that is in contradiction to the terms of a license or authorisation?	Yes
		8.6	Does your country allow for sharing with other States such information as the disbarment of brokers and revocation of registration?	No
		8.7	Does your country regulate activities that are closely associated with the brokering of SALW?  8.7.1. If so which of the following activities are regulated when undertaken in connection with the brokering of SALW (check relevant boxes)?	Yes
			a) Acting as dealers or agents	
			b) Providing technical assistance	
			c) Training	
			d) Transport	
			e) Freight forwarding	
			f) Storage	
			g) Finance	
			h) Insurance	

i) Maintenance	
j) Security	
k) Other services	

8.8 What penalties or sanctions does your country impose for illegal brokering activities?

Criminal sanctions, i.e imprisonment or fines.

Does your country wish to request assistance in developing laws, regulations or administrative procedures to regulate SALW brokering?

No

#### **SECTION 5: STOCKPILE MANAGEMENT**

Sources	Laws, regulations and administrative procedures	
PoA II.17	10. Does your country have standards and procedures relating to the management and security of SALW held by Yes the armed forces, police or any other entity authorised to hold SALW?	
PoA II.17	10.1. If so, which of the following provisions are included in these standards and procedures (check relevant boxes)?	
	a) Appropriate locations for stockpiles	
	b) Physical security measures	
	c) Control of access to stocks	
	d) Inventory management and accounting control 📝	
	e) Staff training	
	f) Security, accounting and control of SALW held or transported by operational units or authorised personnel	
	g) Procedures and sanctions in the event of theft 💟	
	or loss	
	h) Other	

# Sources Surplus

PoA II.18

10.2. Are there systems in place to conduct reviews of SALW stocks held by armed forces, police and other authorised entities to identify surplus or obsolete SALW?

Yes

10.3. How often/frequently are these reviews conducted?

Within the Federal Armed Forces, a distinctive control system is in use, the periodicity of which may be summarized as follows: (i) Guard and MP Units: 100% inventory check at each change of shift (ii) Combat units: Routine checks are carried out on a weekly basis (iii) Depots and stockpile facilities: Routine checks are carried out every two weeks; additionally, non-periodical checks are carried out after any movement of any kind of SALW. Periodical as well as challenge inspections carried out by higher command authorities further add to the reliability of the system. Detailed documentation is established on every control measure. Within the Federal Customs Administration external stocks are reviewed every half year / own stocks annually. The Federal Police conducts reviews annually

PoA II.18

10.4. When stocks are identified as surplus, what actions does your country take with regard to the surplus (check relevant boxes)?

> PoA II.23a 13.1 How many SALW were found, seized or confiscated?

? During the reporting period, a total of 5,089 small arms and 4 light infantry weapons were seized and confiscated by the. Federal Criminal Police Office (Bundeskriminalamt, BKA) Specifically, these weapons were as follows: 3199 - revolvers and self-loading pistols 1695 - rifles and carbines 106 - submachine guns 54 - assault rifles 35 - light machine guns 4 Hand-held under-barrel grenade launchers The Federal Customs seized and confiscated 327 SALW Seized, confiscated weapons are held under the supervision of the relevant prosecutor The prosecution decides in due time about the further use of the weapon. None of these weapons were destroyed in 2011

PoA II.16 13.2. What action was taken with respect to the SALW found, seize or confiscated (check relevant boxes)?

> a) Stored securely pending further action b) Marked c) Registered or recorded

d) Destroyed

e) Other

Handed over to customs for educational or scientific purposes (decision by prosecutor)

Sources Collection

14. During the reporting period, did your country collect any SALW?

No

### International assistance

PoA III.6 16. Does your country wish to request assistance in building capacity for confiscation and seizure of the illicit SALW?

No

#### **SECTION 7: MARKING AND RECORD KEEPING**

Sources Marking

PoA II.8

ITI 8c

17. Does your country enforce measures to prevent the manufacture, stockpiling, transfer and possession of any unmarked or inadequately marked SALW?

17.1. Details

Individuals and Institutions involved in manufacturing, posession, trade and transfer of SALW are obliged to mark weapons and parts of weapons and register them. Each arms manufacturer is obliged to keep an arms manufacturing register (Waffenherstellungsbuch) and a register of the trade in arms (Waffenhandelsbuch). These registers contain information on the production of arms, the recipients of the arms, the production numbers and the production signs (e.g. registered trademarks or the name of the manufacturer)

ITI 8d 18. Does your country take measures to ensure that all SALW in the possession of government armed and security forces for their own use are duly marked?

Yes

18.1. Describe the markings that are applied to government-held stocks.

The following remarks apply to police-held weapons: Name of the manufacturer, Country of manufacture, Serial number, Year of manufacture, Weapon Type(model, Caliber, Proofing (testing), Other Weapons of the Federal Customs Administration must carry the title holding authorities' sign; they are permanently marked with the acronym "BZV" for "Bundeszollverwaltung". Weapons built before the 1960s - at that time marked with the identification "BUND" - may also be still in use today. Weapons designated for use in West Berlin until 1989, were not allowed to bear the identification marks mentioned above. Pistols were marked with "AK" (Alliierte Kommandantur = Allied Headquarter); sub-machine guns were only allowed to be delivered to West Berlin by foreign manufacturers and thus bore different foreign identification marks, e.g. "MAS" when built and delivered by a French manufacturer. As far as these weapons came to be in use with the Federal Finance Administration past 1989, they were additionally marked with "BZV". Revolvers only bear the serial number and proof firing stamp. Under sec. 55 (4a) WaffG, all firearms in use with the Federal Finance Administration must carry the title holding authorities' sign. Serial numbers and other marks are stamped mechanically on the weapon with a pressure of up to 100 kilograms per square millimetre. The marks have a depth of 0.4 to 0.5 millimetres. Laser engraved marks used for hardened materials have a depth of 0.025 millimetres. In the case stamped or laser-engraved marks are completely ground off and thus no longer visible, it is possible to restore the original marks by chemical and technical means. Each weapon of the Federal Armed Forces is unambiguously marked and bears the following information: manufacturer, weapon type, caliber, month and year of delivery ex works, serial number, proof firing stamp, possibly additional marks, such as, e.g., maintenance information. The marks are applied in accordance with the standards of applicable technical manuals and

are unique.

18.2. When government stocks are transferred to civilians or private companies in your territory, are such stocks marked to indicate that your government transferred the stocks?

Yes

19. Does your country encourage manufacturers of SALW to develop measures against the removal or alteration www.poa-iss.org/reporting/reporting/ReportingTemplatePrint.aspx?ReportingPoA Id=166

--- Select ---

7/11

of markings?

# Record-keeping

PoA II.9 20. Does your country have standards and procedures related to keeping of records for all marked SALW in its territory?

Yes

20.1. What records relating to SALW are kept by the State (e.g. manufacturing, brokering, import and export licences granted, sales to other States, SALW held by State agencies such as the armed forces etc)? Each arms manufacturer is obliged to keep an arms manufacturing register (Waffenherstellungsbuch) and a register of the trade in arms (Waffenhandelsbuch). These registers contain information on the production of arms, the recipients of the arms, the production numbers and the production signs (e.g. registered trademarks or the name of the manufacturer). Upon consultation of the registers, it is possible to determine whether a specific marked arm was manufactured by the company in question. Markings may differ according to clients' wishes, but is guaranteed that later identification is possible. Concerning war weapons, companies have to observe special reporting obligations by submitting bi-annual statements to the Federal Office of Economics an Export Control (Bundesamt für Wirtschaft und Ausfuhrkontrolle; official acronym: "BAFA") on all registered transactions. Every second year BAFA carriers out inspections based on these statements. Other records are proofs of sale, export licenses, import licenses, proofs of licenses. The customs authority keeps individual, detailed records containing the "life data" of each weapon, e.g. name of manufacturer, country of

ITI 12 a,b

20.2. How long does the government keep such records?

All license holders are obliged to keep the necessary documents for at least ten years in order to make on-site inspections of the supervising authorities possible. Such on-site inspections take place regularly and may be carried out as challenge inspections

manufacture, serial number, year of manufacture, weapon type/model, caliber, proofing/testing and repairing details

ITI 13

20.3. In the event that they go out of business, are companies engaged in SALW activities (e.g. manufacturing, importing, exporting etc) required to submit all records held by them to the government?

Yes

# International assistance

## Any further comments on PoA and ITI, including implementation challenges and opportunities?

Germany recognises the importance of the control of Small Arms and Light Weapons for security and stability as well as for a prosperous economic and social development. The UN Programme of Action on SALW provides for the tools to control the proliferation and illicit use and traffick of Small Arms and Light Weapons and is the international reference instrument in question. Germany supports the implementation of the PoA on a national, regional and global level and would like to stress in particular the following points: The control of ammunition and munitions should be integral part of the efforts to control SALW and to implement the PoA. Munitions pose a risk per se as their deterioration can lead to uncontrolled explosion or environmental contamination. Moreover, the effective control of ammunition will have a fast and noticeable impact on the control of Small Arms as the latter cannot be operated without the former. Germany encourages regional organisations to play an enhanced role in the implementation of the UN PoA. Regional organisations can promote cooperation and information exchange crucial for border control, tracing of arms and the fight against arms smuggling and organised crime. Germany sees scope to enhance the role of women in the security sector; including in the field of Small Arms Control. Security Council resolution 1325 (2000), reaffirming the important role of women in the prevention and resolution of conflicts and in peace-building, urges States to ensure increased representation of women at all decision-making levels in national, regional and international institutions and mechanisms for the prevention, management, and resolution of conflict. Germany sees in particular an increased role for women in the field of Small Arms and Light weapons. It values the coordinating role of UNODA. We appreciate the clearing mechanism established by the publication "Matching Needs and Resources" and encourage states to contribute as donors and recipients by defining and updating the project list. Germany
